## Craig Rozynski's Comic Neue fonts for LaTeX

Silke Hofstra, tex@slxh.nl

Documentation for comicneue v1.1.
January 3, 2017

This package provides the Comic Neue fonts in an easy to use way. For XƎLaTeX and LuaLaTeX users the original OpenType fonts are used. The entire font family is included.

Comic Neue is a redesign of the infamous Comic Sans font. More information about this redesign can be found on comicneue.com.

This package is also available on GitHub.

## 1 Options

The package has the following options:

- **light**: use the light weight by default.
- **regular**: use the regular weight by default.
- **angular**: Use the angular variant instead of the normal one.
- **scale**: Change the scaling with a factor. For example: `scale=.5`
- **default**: Sans-serif is set as default font family.
- **sfdefault**: Comic Neue is set as sans-serif family.
- **nosfdefault**: Comic Neue is not set as sans-serif family.
- **type1, t1**: Override automatic detection and use the Type 1 fonts.
- **opentype, otf**: Override automatic detection and use OpenType fonts.

The following options are enabled by default: sfdefault, regular.

## 2 Commands

Commands for all weights and styles are also provided:

- **\comicneue** – the regular and bold weights.
- **\comicneuelight** – the light and bold weights.
- **\comicneueangular** – the regular and bold weights in the angular style.
- **\comicneuelight** – the light and bold weights in the angular style.

## 3 Licence

The Comic Neue fonts are available under the SIL Open Font License.
All LaTeX code is available under the LaTeX project public license v1.3 or later.

## 4 Specimen

Simple specimen are included on page 3.

## 5 Version history

### 1.1

- Joseph Wright: **\sys_if_engine** replaces **\pdftex_if_engine** (pull request #1).

## 1.0

- Initial release with v2.2 of the fonts.
